International Directory for Australian Shepherd Health (IDASH)

ASHGI established IDASH to provide breeders and owners with specific pedigree-based health information and to enable breeders to make more informed breeding decisions as regards health and unwanted inherited traits in the Australian Shepherd. It offers two basic services:

IDASH Open Health Database – This searchable database provides public domain and owner-submitted health and trait data. Owner-submitted items are supported with documentation. If you are interested in reading more about the data qualification process click "Rules & Criteria" in the menu at left.

IDASH Pedigree Analysis Service – *(presently in software development, expected completion sometime in 2014)* This program, originally developed by C.A. Sharp for Collie Eye Anomaly only, has grown over the years to include a variety of health issues and inherited faults. It became an ASHGI program in 2008. For a \$20 fee we will provide dog owners with a certificate advising them of potential genetic risk for each of the traits tracked.

Open Health Database Search

You can enter search information in one or more fields. Leaving fields empty will select everything for that field. The more traits at a time you chose the longer the search will take.

– Dog Information:

Registered Name:  Registration Number:   
(Or call name if not registered)

Date Of Birth, Find all dogs between:

Date 1:  (yyyy-mm-dd) Sex:

Date 2:  (yyyy-mm-dd) Coat Color:

– Choose Traits: (Not selecting any will chose all traits, search could be long)

– Trait Groups

- Bladder & Kidneys
- Bones and Joints
- Coat Color Disqualifications
- Cancer
- Dental
- Eye Diseases & Defects
- Gastrointestinal
- Heart and Blood Diseases
- Immune-Mediated Diseases
- Metabolic and Endocrine Diseases
- Neurological Diseases**
- Degenerative Myelopathy
- Epilepsy
- MDR1
- Myasthenia Gravis
- Neuronal Ceroid Lipofuscinosis
- Reproductive Diseases & Defects
- Skin Diseases

– Trait Result Types
